Contents

HARD COATINGS

Fundamentals of hard coatings

From diamond-like carbon to diamond coatings 1
R. Messier, A. R. Badzian, T. Badzian, K. E. Spear, P. Bachmann and R. Roy (University Park, PA, U.S.A.)

Advanced layer material constitution 11
H. Holleck and H. Schulz (Karlsruhe, F.R.G.)

High temperature microhardness of hard coatings produced by physical and chemical vapor deposition 19
D. T. Quinto, G. J. Wolfe and P. C. Jindal (Greensburg, PA, U.S.A.)

Young's modulus of TiN, TiC, ZrN and HfN 37
E. Török, A. J. Perry (Waldenburg, Switzerland), L. Chollet (Neuchâtel, Switzerland) and W. D. Sproul (Des Plaines, IL, U.S.A.)

Surface and interface characterization of heat-treated (Ti,Al)N coatings on high speed steel substrates 45
H. A. Jehn, S. Hofmann (Stuttgart, F. R. G.) and W.-D. Münz (Hanau, F.R.G.)

Microstructure and physical properties of polycrystalline metastable $Ti_{0.5}Al_{0.5}N$ alloys grown by d.c. magnetron sputter deposition 55
G Håkansson, J.-E. Sundgren (Linkoping, Sweden), D. McIntyre, J. E. Greene (Urbana, IL, U.S.A.) and W.-D. Münz (Hanau, F.R.G.)

$Ti_xAl_{1-x}N$ films deposited by ion plating with an arc evaporator 67
H. Freller and H. Haessler (Erlangen, F.R.G.)

Reactive arc vapor ion deposition of TiN, ZrN and HfN 75
O. A. Johansen, J. H. Dontje and R. L. D. Zenner (St. Paul, MN, U.S.A.)

On the properties of physically vapour-deposited Ti–Al–V–N coatings 83
O. Knotek, T. Leyendecker and F. Jungblut (Aachen, F.R.G.)

Characteristics of titanium arc evaporation processes 91
P. J. Martin, D. R. McKenzie, R. P. Netterfield, P. Swift, S. W. Filipczuk, K.-H. Müller, C. G. Pacey and B. James (Sydney, N.S.W., Australia)

Lattice vacancies in TiN and HfN films: a study by positron annihilation . . . 103
J. Brunner (Zürich, Switzerland) and A. J. Perry (Troy, MI, U.S.A.)

Plasma conditions for the deposition of TiN by biased activated reactive evaporation and dependence of the resistivity on preferred orientation 115
B. H. Hahn, J. H. Jun and J. H. Joo (Seoul, Korea)

Structure, internal stresses, adhesion and wear resistance of sputtered alumina coatings 123
Th. Roth, K. H. Kloos and E. Broszeit (Darmstadt, F.R.G.)

Adhesion and structure of TiN arc coatings 135
E. Ertürk and H.-J. Heuvel (Bergisch Gladbach, F.R.G.)

Characterization of hard coatings

Auger electron spectroscopy and Rutherford backscattering spectroscopy studies of TiN and TiC coatings prepared by the activated reactive evaporation process 149
N. Kaufherr, G. R. Fenske, D. E. Busch (Argonne, IL, U.S.A.), P. Lin, C. Deshpandey and R. F. Bunshah (Los Angeles, CA, U.S.A.)

Solid solution hardening in high rate reactively sputtered (Hf, Ti)N coatings . 159
G. R. Fenske, N. Kaufherr (Argonne, IL, U.S.A.) and W. D. Sproul (Des Plaines, IL, U.S.A.)

The chemical analysis of TiN films: a round robin experiment 169
A. J. Perry, C. Strandberg (Troy, MI, U.S.A.), W. D. Sproul (Des Plaines, IL, U.S.A.), S. Hofmann (Stuttgart, F.R.G.), C. Ernsberger, J. Nickerson (Elkhart, IN, U.S.A.) and L. Chollet (Neuchâtel, Switzerland)

Thin film characterization using a mechanical properties microprobe 185
W. C. Oliver, C. J. McHargue and S. J. Zinkle (Oak Ridge, TN, U.S.A.)

Three-dimensional secondary ion mass spectrometry analysis of surface-modified materials and the application to ^{13}C-implanted steels 197
R. H. Fleming, G. P. Meeker and R. J. Blattner (Redwood City, CA, U.S.A.)

Cathodic arc plasma deposition of TiC and TiC_xN_{1-x} films 209
H. Randhawa (Boulder, CO, U.S.A.)

Failure mode analysis of coated tools 219
E. Bergmann, J. Vogel and L. Simmen (Balzers, Liechtenstein)

Characterization of r.f.-sputtered zirconia coatings 233
N. Iwamoto, Y. Makino and M. Kamai (Osaka, Japan)

A study of crack initiation and propagation in Ni–Cr thermally sprayed coatings using acoustic emission techniques 243
J. G. Mora-Marquez and J. Lira-Olivares (Caracas, Venezuela)

Hard tribological coatings and modified surfaces

Properties and performance of chemical-vapour-deposited TiC-coated ball-bearing components 253
H. J. Boving and H. E. Hintermann (Neuchâtel, Switzerland)

Wear resistance of metastable Ni–B alloys produced by chemical vapor deposition 267
A. W. Mullendore and L. E. Pope (Albuquerque, NM, U.S.A.)

Hard molybdenum coatings prepared by cathodic magnetron sputtering . . . 281
J. Danroc, A. Aubert and R. Gillet (Grenoble, France)

PROPERTIES OF COATINGS USED IN MICROELECTRONICS

Thin film barrier layers

Growth and properties of TiN and TiO_xN_y diffusion barriers in silicon-on-sapphire integrated circuits 287
N. Kumar, M. G. Fissel, K. Pourrezaei (Philadelphia, PA, U.S.A.), B. Lee and E. C. Douglas (Somerville, NJ, U.S.A.)

Stoichiometry in Ti–N barrier layers studied by X-ray emission spectroscopy 303
M. Dapor, M. Elena, S. Girardi, G. Giunta, L. Guzman and A. M. Narsale (Trento, Italy)

The effects of processing parameters on the microstructure and properties of sputter-deposited TiW thin film diffusion barriers 313
J. M. Oparowski (Northboro, MA, U.S.A.), R. D. S. Sisson, Jr., and R. R. Biederman (Worcester, MA, U.S.A.)

The preparation and characterization of titanium boride films 329
J. G. Ryan, S. Roberts, G. J. Slusser and E. D. Adams (Essex Junctions, VT, U.S.A.)

An electron spectroscopy study of the growth and thermally activated diffusion of nickel thin films on Al(111) and Al_2O_3/Al(111) 341
J. E. Crowell, J. G. Chen and J. T. Yates, Jr., (Pittsburgh, PA, U.S.A.)

Metallization for very-large-scale integrated circuits

Transport in refractory metals and their interactions with SiO_2: comparison of tungsten and molybdenum 349
L. Krusin-Elbaum, M. O. Aboelfotoh, T. Lin and K. Y. Ahn (Yorktown Heights, NY, U.S.A.)

Effects of substrate bias on the resistivity and microstructure of molybdenum and molybdenum silicide films. 359
J. S. Lin, R. C. Budhani and R. F. Bunshah (Los Angeles, CA, U.S.A.)

Planarization of aluminum alloy film during high rate sputtering 369
V. Hoffman, J. Griswold, D. Mintz and D. Harra (Palo Alto, CA, U.S.A.)

Study of the initial aluminide phase growth in Al/Pt couples 379
X.-A. Zhao, E. MA, H.-Y. Yang and M.-A. Nicolet (Pasadena, CA, U.S.A.)

Electrochemical adjustment of thin film Ti–Pd resistors 387
D. J. Sharp and D. P. Norwood (Albuquerque, NM, U.S.A.)

A measurement of the distribution of argon in sputter-deposited very-large-scale integration metallization 401
R. L. Hance, C. Hong and R. E. Pyle (Austin, TX, U.S.A.)

Effects of substrate temperature on copper distribution, resistivity, and microstructure in magnetron-sputtered Al–Cu films 409
K. Y. Ahn, T. Lin, P. B. Madakson (Yorktown Heights, NY, U.S.A.) and V. Hoffman (Palo Alto, CA, U.S.A.)

Iron and nickel thin film deposition via metallocene decomposition 421
G. T. Stauf, D. C. Driscoll, P. A. Dowben (Syracuse, NY, U.S.A.), S. Barfuss and M. Grade (Berlin, F.R.G.)

Thin films used in packaging technology

Die bond materials and bonding mechanisms in microelectronic packaging . 431
G. S. Selvaduray (San Jose, CA, U.S.A.)

Wafer back metallization for semiconductor packaging 447
N. P. Kim and R. F. Cooley (Santa Clara, CA, U.S.A.)

Characterization of plasma-deposited silicon nitride coating used for integrated circuit encapsulation 459
V. S. Dharmadhikari (Melbourne, FL, U.S.A.)

New materials and emerging technologies

A comparison of tungsten film deposition techniques for very-large-scale integration technology 469
K. Y. Ahn (Yorktown Heights, NY, U.S.A.)

Preparation, electrical properties and optical characterization of Cd_2SnO_4 and $CdIn_2O_4$ thin films as transparent and conductive coatings 479
T. Pisarkiewicz, K. Zakrzewska and E. Leja (Krakow, Poland)

Preparation and properties of cubic boron nitride coatings 487
P. Lin, C. Deshpandey, H. J. Doerr, R. F. Bunshah (Los Angeles, CA, U.S.A.), K. L. Chopra and V. Vankar (New Delhi, India)

A-heterojunction and dielectrically insulated gate InP field effect transistors* 497
C. M. Hanson and H. M. Wieder (La Jolla, CA, U.S.A.)

Microelectronics

WN_x: properties and applications 507

* Recipient of the Bunshah Award for the best paper in its Symposium.

F. C. T. So, E. Kolawa, X.-A. Zhoa and M.-A. Nicolet (Pasadena, CA, U.S.A.)

Plasma-enhanced chemical vapor deposition of silicon nitride from 1,1,3,3,5,5-hexamethylcyclotrisilazane and ammonia 521
T. A. Brooks and D. W. Hess (Berkeley, CA, U.S.A.)
